M.A. National Security

The Master of Arts in National Security can lead to a wide variety of jobs involving national security, intelligence collection and analysis, and homeland security.

The Bureau of Labor Statistics shows potential for a 28% job growth in information security analyst jobs and a 27% growth in operation research analyst positions.

All courses in SFA's 36-credit hour program are delivered in an all-online format, and the program includes stackable certificates:

- Certificate in Intelligence Studies

The program comprises a nine-hour core and 24 hours of electives, and three hours of comprehensive exam designed to mimic the type of civil exam students would take in a chosen field.

The core:

NSS 500 Introduction to Intelligence and Security Studies
NSS 501 Research and Writing in National Security and Intelligence
NSS 520 Interagency Operations, Counter Intelligence and Homeland Security
